COURSE TITLE

SQL Basics: Database Creation & Updates

CHAPTER TITLE

**Data types: Date, Time
(DATETIME, DATE, TIME, YEAR, TIMESTAMP)**

- 1** Date, Year, and Datetime are the major date types under Date, Time category.
- 2** Defining correct data types will enable you to prevent errors in the database
- 3** You can use the 'TIMESTAMP' data type to automatically enter the current timestamp at which the record is created.
